

FAQs

Q: What does the treatment feel like?

A: The treatment is comfortable. During the treatment you may feel a warm sensation that causes no discomfort.

Q: When will I see results?

A: You will see visible results within 4 weeks of treatment, noticing reduction of swelling and redness surrounding the acneic lesions.

Q: Is the treatment safe?

A: The treatment is very safe, and clinical trials as well as extensive clinical experience have validated its safety and effectiveness.

Q: How long does the treatment take?

A: The procedure can be performed in as little as 10 minutes or less, depending on the size of the treatment area.

Q: How quickly will I recover?

A: There is no downtime and you will be able to resume your regular activities immediately following the treatment.

Q: Are there any side effects?

A: You might experience temporary redness in the treatment area, which should subside within a few hours.

Q: How many treatments are required?

A: The typical regimen is 8 short treatment sessions over a period of one month to reduce papules and pustules by 60-65%.

Q: What are the advantages of SharpLight's treatment?

A: Treated patients experience zero side effects, shorter disease duration and reduced psychological stress, as well as reduced likelihood for acne lesions to leave permanent scars.

Q: Why is SharpLight's treatment preferable to topical medications?

A: Topical acne medications tend to irritate the skin and more than 40% of acne bacteria are insensitive to oral antibiotics. Most topical treatments produce minor to severe side effects, they tend to get costly for refills, and usually require 3-4 months of non-stop application.

Why you should choose acne treatment with SharpLight

- ▶ Non-invasive and safe treatments
- ▶ Results are achieved quickly and are long lasting
- ▶ Eliminates side effects associated with topical medications
- ▶ Zero downtime
- ▶ Effective on all skin types

*Treatment of mild to moderate acne.

What our Practitioners are Saying:

Dr. Julian O. Moore
Dermatologist, F.A.O.C.D.M.D

“ SharpLight's platform offers faster results with fewer treatments using their proprietary DPC technology. Combining this elite technology with both superior customer service and marketing support makes SharpLight easily stand out from other med-aesthetic companies. ”

SHARPLIGHT™
the beauty of your success

Acne

Don't let your situation
stop you ever again

Acne treatments using the advanced light-based technology: Dynamic Pulse Control (DPC) are safe and effective for treating mild and moderate inflammatory acne. The light energy destroys the bacteria that causes the acne and enhances the healing process by increasing blood flow to the skin.

Say goodbye to Acne and hello to fabulous and smooth looking skin

Acne doesn't have to be part of your life anymore. You can easily restore your skin to its natural beauty using a quick and simple drug-free method. Say goodbye to creams and medications, and hello to soft and smooth skin that you will absolutely love.

Acne is one of the most common skin concerns and affects almost 80% of individuals aged 11-30. It can be caused by a variety of factors such as hormonal imbalances, stress, or environmental factors such as air pollution.

How does it work?

Dynamic Pulse Control (DPC) is a light-based technology that has been clinically proven to effectively treat mild to moderate acne. DPC uses three effective, safe and reliable clinical mechanisms : Visible Blue light absorption to destroy the bacteria, Yellow light to coagulate the feeding blood vessels and Infrared light to dry the lesions. Clients enjoy the benefits of a painless treatment where results are achieved quickly without any side effects.

Seeing is Believing

What our Patients are Saying:

“ SharpLight's acne treatments have helped with my inflammatory acne. I've tried several topical medications but nothing seemed to work. I have finally gained back my confidence. ”

Brodey Clark -
SharpLight Patient

“ I can't recall the last time when I didn't have facial acne. After a few short treatments from SharpLight, I can immediately see the acne clearing up. I have never been happier. ”
