

## FAQs

**Q. How long do the treatments take and are they safe?**

**A.** Cellulite treatments take around 20-40 minutes, depending on the size of area being treated. These treatments are non-invasive, **100%** safe and pain-free! There is no downtime associated with the treatments so you are able to resume your regular activities immediately following treatment.

**Q. When will I see results?**

**A.** Following the very first treatment you will see an improvement in your skin. There will be a decrease in cellulite and your skin will feel firmer and tighter. However, to achieve optimal long-term results, a series of treatments is recommended.

**Q. I've tried everything to get rid of cellulite. Why does the SharpLight cellulite treatment work?**

**A.** SharpLight's Radio-frequency technologies have been clinically proven to reduce unwanted cellulite. Unlike gels or creams, the treatment structurally changes the skin. It eliminates fat deposits and the fibers- the two factors that cause cellulite.

**Q. Are there any side effects?**

**A.** You might experience temporary redness in the treatment area which should pass within a few hours.

# Eliminate Cellulite Today!

Almost all women develop cellulite, but this doesn't mean you need to live with it. If the cellulite on your body is bothering you, you can get rid of it in no time, and go back to wearing your favorite swimsuit!

Cellulite affects almost **90%** of women at some point during their lives. It appears regardless of your body weight, it usually affects women who are otherwise slender and fit. Cellulite is often genetic and worsens with age.

## How does Cellulite Reduction work?

During treatment, your aesthetic practitioner will use Radio-frequency that targets water in the fat cells. These fat cells are usually enlarged and are the reason behind the dimpling of the skin. The wavelengths heat up the fat cells and cause them to significantly reduce in size. The heat also breaks the extracellular fibers that cause the dimpling of the skin. As a result, the skin is restored to its original form.

## Seeing is Believing

## What our Patients are Saying:

“ I was always conscious of my thighs due to my cellulite. But after getting the body contouring treatment, it helped to diminish the cellulite and tighten my skin. I can now wear short shorts and show off my legs! ”

Jessica Klint - SharpLight Patient

Between the ages of **25-30** is when people start seeing the appearance of cellulite

Women get more cellulite than men
